

Seun Faluyi

Tech Product Manager

Personal Profile

I am a Product Manager with a strong interest in managing cross-functional software teams and scaling technology products to meet market demands. I have a rich engineering and product experience and this unique background makes me valuable to any product team.

Work History

Product Manager

Remerge

Jan 2022 - Present. Berlin, Germany

- Doing the most in mobile advertising.
- Responsible for optimising mobile creatives.

PRODUCT CO-ORDINATOR - SOFTWARE ENGINEER

Andela

2018 - 2020. Lagos, Nigeria, Remote.

- I was part of the team responsible for the organization's biggest up-sell to date.
- Worked across diverse agile development teams to build technology products.
- Co-ordinated a team of 21 software engineers working on a travel tool.
- I currently record the highest number of reads on the organization's technical article digest.

TECHNICAL PRODUCT TEAM LEAD

Ezetradein

2018 - Contract. San Fransisco, United States.

- At Ezetradein, I was responsible for leading a team of 5 Engineers that built version 1 and version 2 of the market place software.
- Contributed immensely to its progress of the product until it got into the YC incubator program.

Product Manager

Pvotal Technologies (Formerly 3Rein)

April 2021 - Dec 2021. Oregon, Dubai

- Working with the Data, Business, Design, Engineering teams to transform ideas into enterprise-grade cloud applications in half the time, cost, and effort than traditional approaches.

PRODUCT MANAGER

Babbangona

May 2020 - Sept 2020. Lagos, Nigeria

- Interacted with key stakeholders to build agricultural products that directly impacted over 25, 000 small-hold farmers in Northern Nigeria.
- Managed from end-to-end the building of the software that processes close to 70% of the organisation's revenue.

QUALITY ASSURANCE ENGINEER

ProdPerfect

2019 - 2020 - Contract. Boston, United States

- Work with other QA Engineers to write automation scripts across various products (mostly start-ups) and report irregularities and bugs.

- Worked closely with the data team to normalize dirty data and translated the information into good business needs.

FULL STACK SOFTWARE ENGINEER

Gi-Tech
